Formalities

Obtaining the necessary permits and administrative decisions.

Building

Construction of industrial halls with a wide spectrum of activities along with office buildings.

Final acceptance

We accompany investors obtaining final building acceptances ended with use permit.

|Offer

Architectural concept

Having determined the basic parameters of the future investment with the client, our design department develops initial concept of land development. It takes into account the location of the hall and office building together with road layout, placement of maneuvering areas and parking lots. As part of the prepared concept our team also presents a functional proposal of the interior of the facility.

Investor's satisfaction is
Our priority, which is why
we include all investors'
suggestions within
approved budget.

|Offer

Investor's needs visualisation

We make professional visualizations for designed objects. We create plans covering among others land development, floor plans and photorealistic project investment visualizations. Modern technical solutions, attention to every detail and functional features facilities are a priority for us.

|Realizations

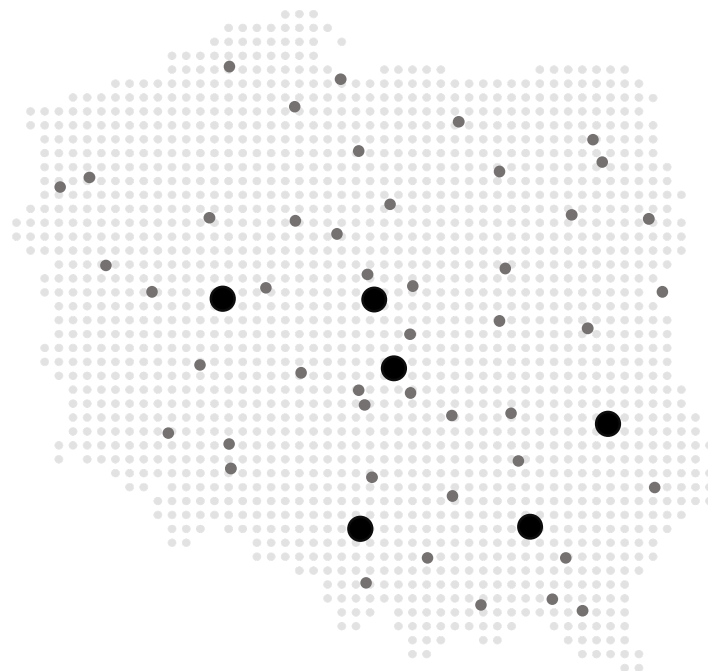

Industrial halls

We build warehouse, production, agricultural, sport and service halls. The objects we build are characterized by special purpose and individual requirements, dependent on the type of technology used or the specifics of the business.

|Realizations

Office buildings

We have extensive experience in project preparation and implementation of office buildings, social and service. We develop construction projects for investors from various industries, taking into account architectural, construction, sanitary, electrical and road projects and technology. We approach each project individually, thanks to which our solutions can be described as "tailor-made".

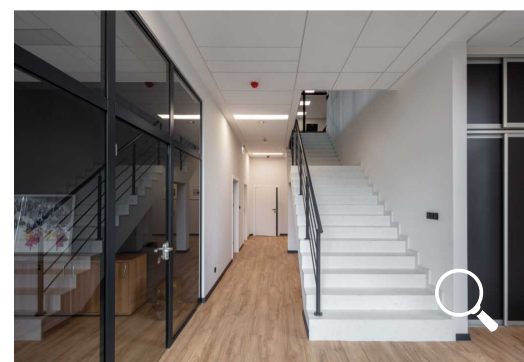

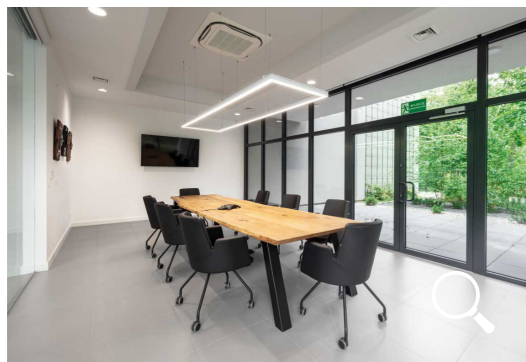

|Realizations

Interiors

Our team of designers takes care of every detail at the interior finishing stage of office parts, social as well as hall spaces. The scope of executive works offered by our company also includes wall and ceiling finishing works, installation of floors, doors, system mats, balustrades and sanitary facilities. Each time the scope of our work is adjusted to the individual needs and expectations of the Investor.

Our achievements

Awards
